COMPETITIVE MANUFACTURING
 NEW STRATEGIES FOR REGIONAL DEVELOPMENT
 Stuart A. Rosenfeld
 With a Foreword by Ray Marshall
 Past state and local industrial policy focused on locational decisions, not on issues of competitiveness. Now, Stuart Rosenfeld argues, the challenge for states and localities is to help industry become more competitive. *Building the competitive advantage of industry is more important than promoting the competitive advantages of location.* Incentives to modernize are more important than subsidies to locate.
 Rosenfeld's book uses the rural South, the most industrialized rural region of the nation, to examine the strengths and weaknesses of manufacturing as the basis for economic growth.
 "Demonstrates how public policies can help companies . . . become high-income, world-class producers." Ray Marshall, former U.S. Secretary of Labor
